## EDUCATION

---

### Pepperdine University

May 2025

*B.S. in Computer Science & Mathematics*

*Summa Cum Laude*

- Cumulative GPA: 3.99 / 4.00
- Coursework: Data Structures, Computer Systems, Machine Learning, Image Analysis, Computer Networking
- Awards: Dean's List; Northrop Grumman Endowed Scholarship (3 selected from the CS program); Darnell Scholarship (awarded by faculty); Natural Science Division Scholarship (3x); Keck Data Science Grant (2x)

## EXPERIENCE

---

### Amazon

June 2025

*Data Engineer I*

*Seattle, WA*

### Amazon

May 2024 – Aug. 2024

*Data Engineer Intern*

*Seattle, WA*

- Designed a data analytics platform consolidating 100k+ B2B Alexa transactions using Airflow, S3, Redshift
- Constructed an AWS based solution to analyze delays in deployment time for prospective Alexa Enterprise clients
- Refactored several queries into a single automated process that includes ETL via AWS Glue, AppFlow and S3 for raw data ingestion, Redshift for data processing, and QuickSight and Amazon Q for data analysis
- Built an internal LLM chatbot with Amazon Bedrock FMs to handle common data inquiries of BD/product teams

### Samsung

May 2023 – Aug. 2023

*Software Engineer Intern*

*Austin, TX*

- Implemented full-stack redesign of Samsung Foundry's defect reporting tool for various in-house equipment
- Integrated scheduled status updates, yield forecasts, and data visualizations using Apache Impala, sklearn, seaborn
- Optimized data architecture by refactoring pipelines on PostgreSQL, Spark, pandas, and Dremio Data Lakehouse

### Pepperdine Information Technology

Aug. 2022 – May 2024

*Software Engineer Co-op*

*Malibu, CA*

- Owned development for sso.pepperdine.edu, a MFA registry platform for the University's online applications
- Reworked eSign, an electronic document signing portal for securely transferring official university documents
- Built applications around ASP.NET Core MVC, MudBlazor, Swagger APIs, C#, Javascript, HTML, CSS

### Keck Institute for Data Science

May 2022 – May 2023

*Research Fellow – Dr. Adam Pennell, Pepperdine University*

*Malibu, CA*

- Modeled minimum AIC, random forest imputation, quantile regression, and P-splines smoothing in R on 14M+ data points to create centile curves for Special Olympic athlete balance used in clinical practice
- Oral presentation at the 2023 International Symposium for Adapted Physical Activity in Dunedin, New Zealand

## PROJECTS

---

### Cell Detector | *Python, Roboflow, scikit-learn, Google Colab*

- A PyTorch CNN pipeline built around YOLO that detects over 1,000 plant cells at a time at a .94 F1 score
- Leveraged active learning to automate cell annotation, speeding up data collection for plant biology faculty

### Team Builder | *Javascript, Apps Script, REST API*

- A Google Sheets script that arranges teams, groups, or rides to events based on Google Forms sign ups
- Developed an algorithm to randomize groups based on drivers/passengers, school year, and historical groups data
- Used by 10+ campus organizations for 100+ events (tracked via custom logging and Google Analytics)

## SKILLS

---

**Languages:** Python, C#, SQL, C++, Java, R, Assembly, JavaScript

**Tools & Frameworks:** AWS, .NET, Spring, FastAPI, JSP, React, Redux, PyTorch, Roboflow, Redshift, Postgres

**Hackathons:** Morgan Stanley CTG Hackathon Spring 2023, Alteryx Datathon 2023 Finalist

**Leadership:** Teaching Assistant (5 semesters): CS 120/121 - Formal Methods/Discrete Structures, Resident Life Advisor
